

ADok 2023

Programme & Events

1

Friday 23/06/2023

09:00 Registration – Festsaal

09:30 Welcome! – HS1

09:45 Talk session I – HS1

09:45 Wiebke Hemming | The perils of being busy: A closer look at task load and clock checking behaviours in time-based prospective memory

10:05 Anton Koger | Influence of cognitive demands on balance control: Event-related study

10:25 Kira Franke | The influence of trust on retrieval of observationally acquired SR bindings

10:45 Coffee break – Festsaal

11:30 Keynote – HS1

Kerstin Fröber | How to survive academia

13:00 Lunch – Festsaal

14:00 Poster session – Festsaal

15:30 Coffee break – Festsaal

16:00 Talk session II – HS1

16:00 Jing Tong | A nest of students? - Classifier congruency effect within- and between language

16:20 Matilde Ellen Simonetti | The impact of overlapping mappings on the acquisition and retrieval of word meanings

19:00 BBQ

2

Saturday 24/06/2023

10:00 Talk session III – HS 1

10:00 Devu Mahesan | Motivated multitasking: does reward affect Task 1 processing when Task 2 is a go/nogo?

10:20 Linda Bräutigam | Motor demands and cognitive control: Does required response force modulate conflict processing?

10:40 Amelie Jung | Modulating between-task interference: Are repeating SOA sequences used for conflict adaptation?

11:00 Coffee break – Festsaal

11:30 Keynote – HS1

Jan Rummel | About the ingenuity of experimental Psychology

13:00 Farewell – Festsaal

Poster Session

14:00 Poster Session – Festsaal

Lisa Marie Cybinski | Transcranial magnetic stimulation to augment fear extinction learning processes

Farid Fares | Algorithmic vs. human decision-making: How does the method of decision-making and the level of communicated fairness influence justice perception? - A higher education perspective

Sarah Koch | Switch and compare: On the crossmodal loudness-number interaction in number discrimination tasks

Matthäus Rudolph | Habit formation reflects episodic retrieval

Robert Huber | Investigating affective conflict produced by emotional facial expressions of ingroup and outgroup members

Inga Mögling | Putting the past behind: Dissociate whether control states at the level of task-set or response-conflict help to disengage from a no longer relevant task

Nice things to do in Greifswald

Walk by the museums harbour

Visit Eldena and the monastery ruins

Visit the fishing village in Wieck

Walk through the old town

Visit the botanic garden

Join the Eldena Beach Party

... and much more!

Pre-conference

Thursday 22/06/2023

12:30 Registration – Festsaal

13:15 Welcome! – HS1

13:30 Workshop Part I – HS1

Franz Wortha | Reproducible workflows in R

15:30 Coffee break – Festsaal

16:00 Workshop Part II – HS1

18:00 End of the day

University main

building

ZPP
